Experts

# How we work

Transparent processes at every stage

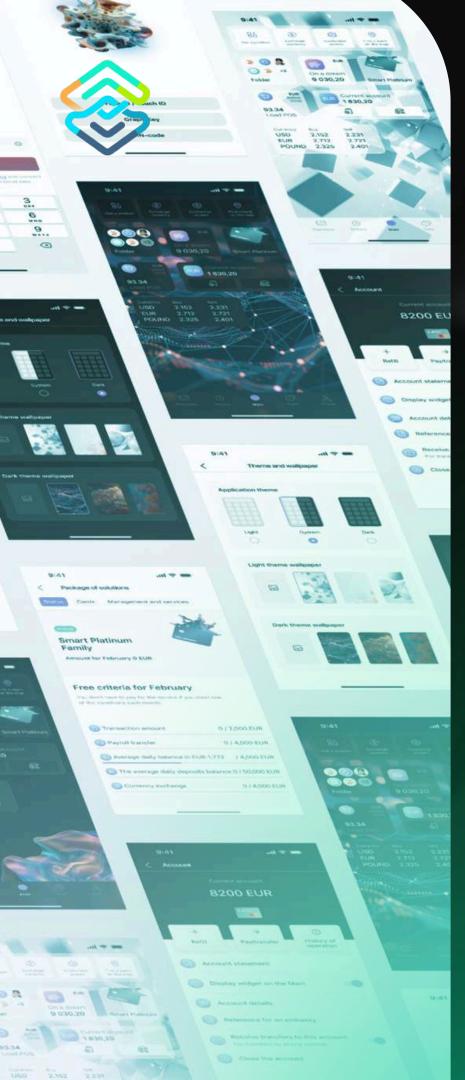

We help define the problem and set clear KPIs.

We reduce costs through process automation.

We integrate at any project stage. Comfortable working with legacy or third-party code.

We can upskill the client's team during the project.
All source code stays with the client.

# Challenges we solve

- O1. Migration from legacy systems to a modern solution
- O2. Complex payment integrations
- 03. Lengthy manual processes
- 04. Developing a strategic and technical roadmap

- Optimizing the team to reduce development costs
- Building a scalable architecture for future growth
- 27. Expanding the team and replacing outdated vendors
- 08. Avoiding insecure vendor and developer lock-in

#### Web & Mobile App Development

#### **Intuitive Mobile Apps:**

Straightforward, secure mobile-first solutions for mid-sized banks and financial institutions.

#### **Leasing & Insurance Portals:**

Delivering seamless self-service platforms with payment integration and automation.

#### **Seamless Integrations:**

connecting third-party APIs, payment gateways like Apple Pay and Google Pay, and external services to enhance functionality and user experience.

# User-Friendly Solutions and Excellent User Experience

# Design System & Streamlined User Journey

We build comprehensive design systems that reduce the customer journey, ensuring faster and more efficient interactions.

#### **Research-Driven Personalization**

We rely on user research and best practices to create personalized experiences that boost engagement and satisfaction.

## Seamless Experiance Across Devices

We ensure a smooth and consistent experience across all platforms, from mobile to desktop.

# Skilled Team & Effective Management

#### **Domain Experts**

Team members with direct experience in Tier 1 banking and fintech projects

## Agile Workflow & Transparent Communication

We follow Agile with sprints and demos, track tasks in Jira, and maintain project communication via corporate messengers like Slack.

#### Flexible Engagement Models

offer time-and-materials or hybrid contracts that adapt to your evolving roadmap.

End-to-End App Development
Native iOS/Android/cross-platform
Mobile apps and Superapps

#### **Core Banking Integrations**

Seamless linking with existing systems to ensure data consistency and secure transactions

High-Volume Transaction Support
Architectures built to handle millions of
daily logins and transactions

#### **Interactive Prototype in 1 Month**

A prototype with key user scenarios for fast feedback and refinement

#### Real-World Hypothesis Testing

MVP launch in 4 months to validate demand with minimal investment

#### **Scalable Architecture**

Built for easy expansion into a full-fledged product

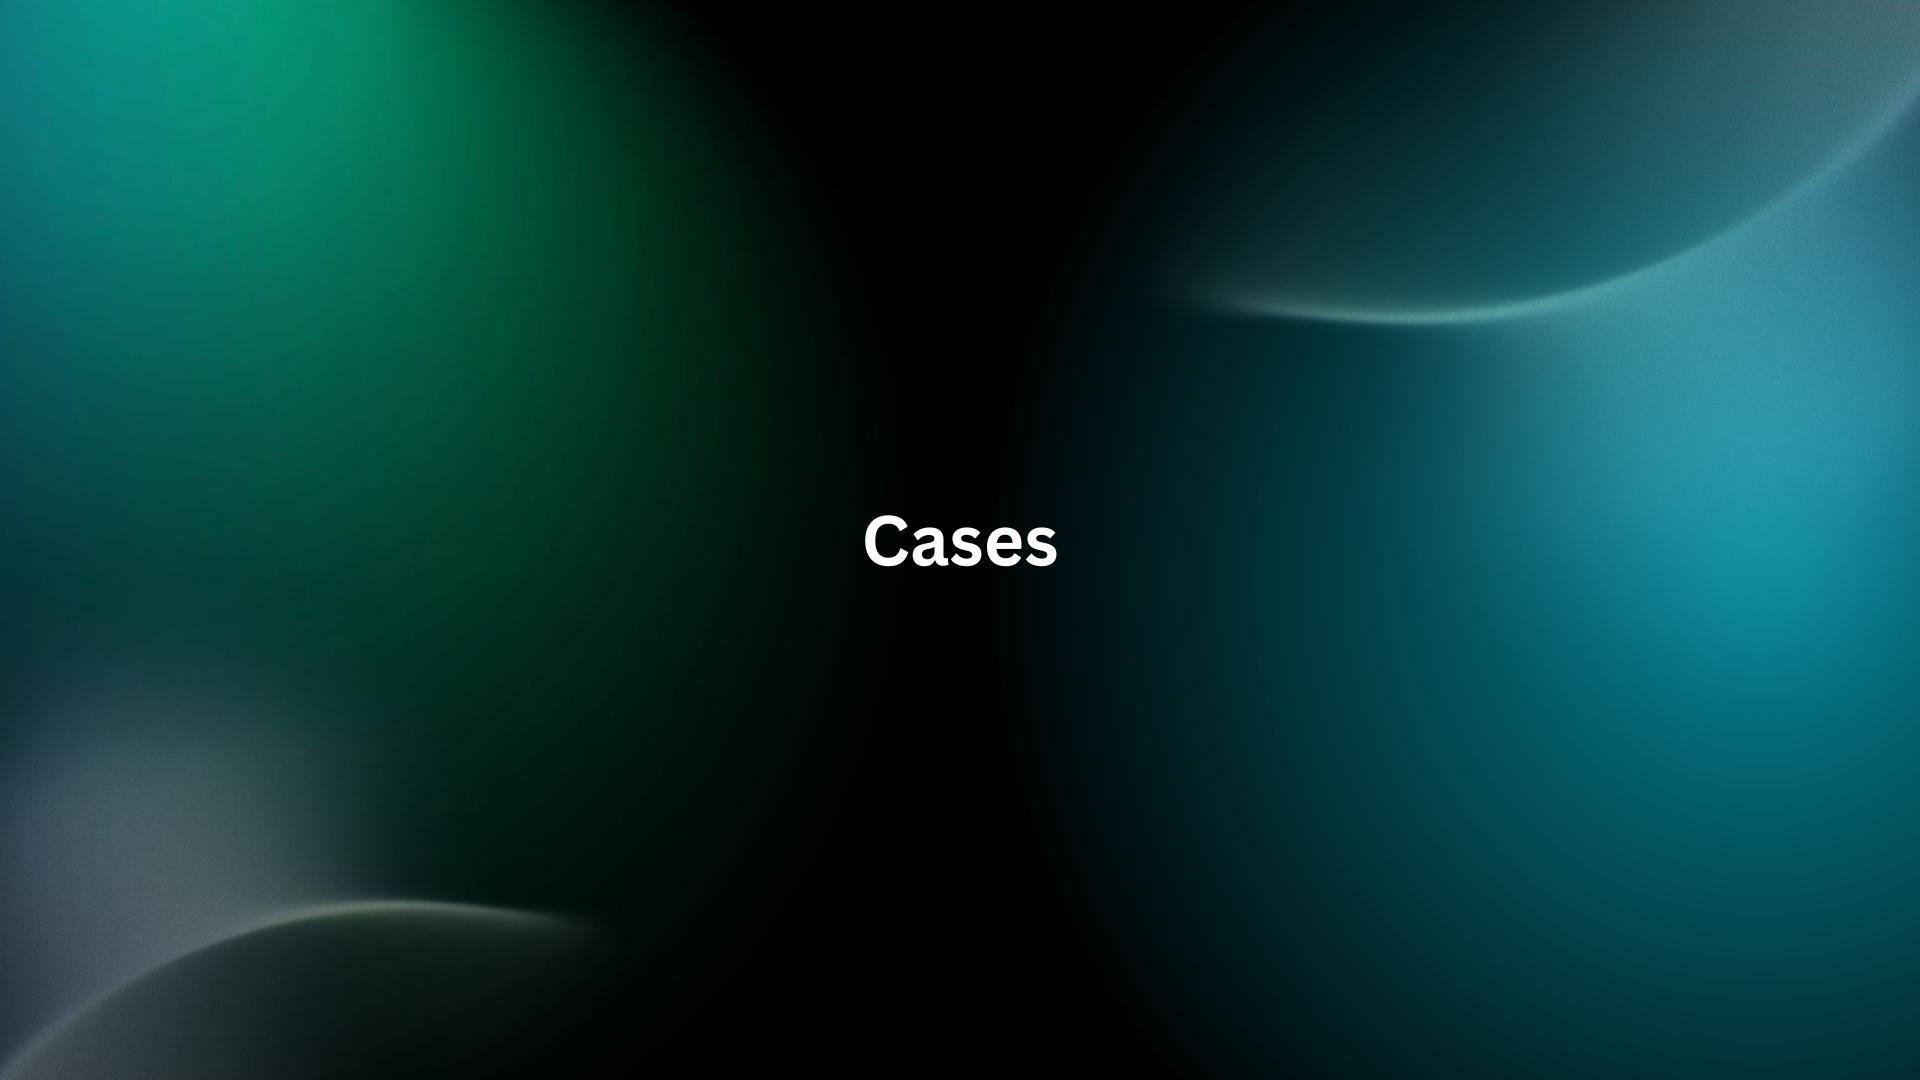

Digital Transformation Roadmaps
Holistic strategies for long-term
modernization and seamless digital
growth.

Performance Optimization & Scalability Boosting efficiency, reducing technical debt, and enabling smooth scaling.

Cost-cutting legacy upgrade

Certifications & Security
ISO 27001 processes, DORA, PCI DSS
alignment, OWASP regular code audits.

# Lending app

for residents of Mexico. Financial start-up entering a new market

#### (Challenge

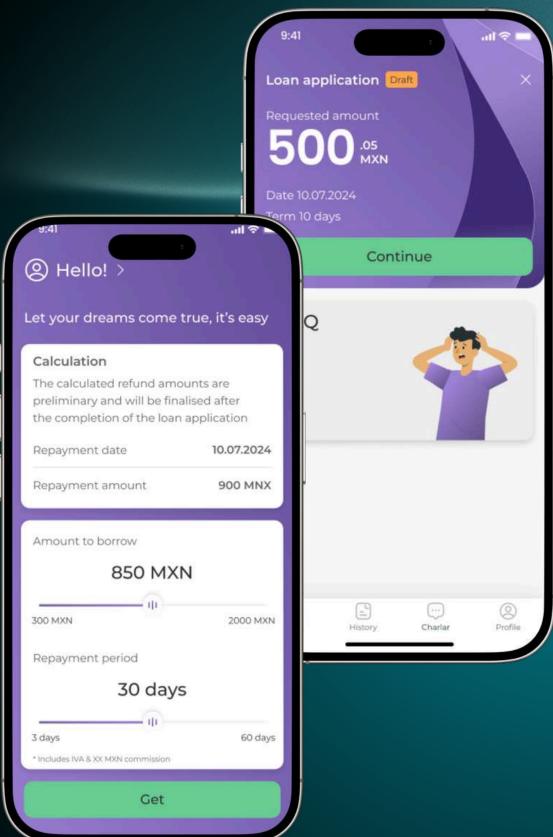

The startup was preparing to enter a new market with only a high-level architecture in place. They turned to us for a detailed solution to minimize time-to-market and optimize team costs.

#### Solution

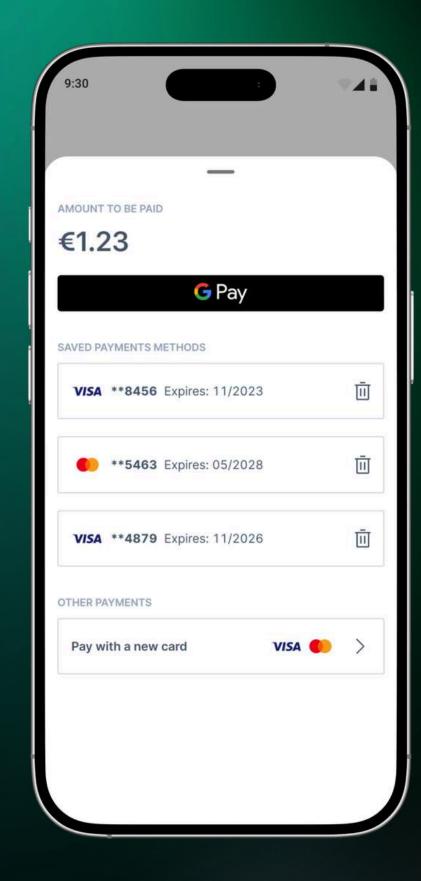

- Implemented as a progressive web application (PWA).
   This reduced team costs by 30% and accelerated time to market.
- A native wrapper was developed for distribution via App Store and Google Play.

#### Result

The first users went to the application after 5 months.

# Android SDK for payment gateway

for an EU-regulated merchant acquirer

#### Challenge

The company needed an MVP for embedded mobile payments. With an existing web SDK, they were looking to expand their services for merchants.

#### Solution

Our work includes:

- screen development
- Google Pay integration
- 3D Secure integration
- integration with third-party applications

#### Result

Android SDK developed in 1 month

# Mobile Banking

for a large commercial bank in Eastern Europe, digital leader in the country

#### Challenge

The bank wanted to create a solution to attract a new generation of customers and build the first fully digital bank in the country's market.

#### Solution

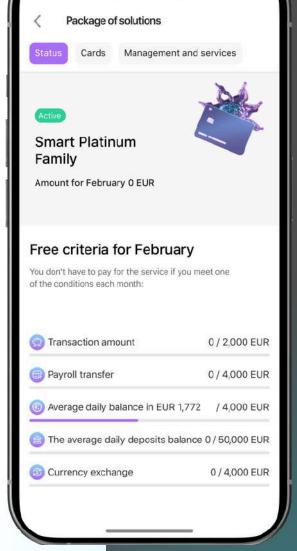

- focused on usability and user experience to offer solutions that had not been on the market before
- allocated a team of 25 people to the project for analytics, development and testing
- first release in 6 months

#### Result

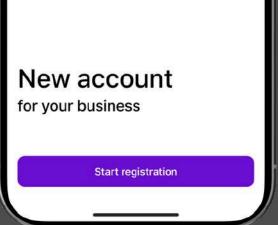

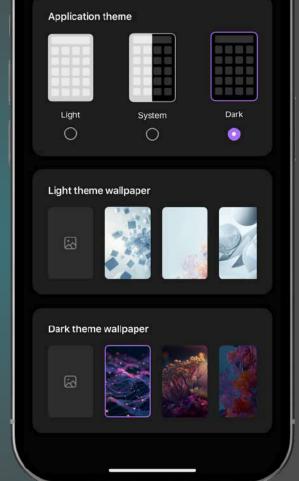

Award winning app with 700,000 users

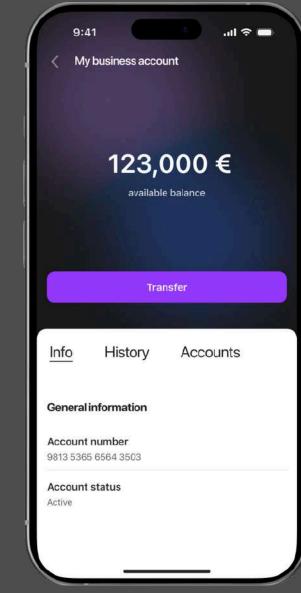

Package of solutions

**Smart Platinum** 

# SuperApp M-Banking

The first superapp on the country market in Eastern Europe

#### Challenge

The bank planned to create a superapp that would combine mobile banking for individuals and entrepreneurs and a mobile operator account. It should also be a fully digital bank with online customers.

#### Solution

- Our cross-functional team, including developers, analysts, testers, and managers, built the application from the ground up and continued its development post-launch
- first release 9 months after launch

#### Result

Best Digital Bank according to Global Finance with 1+ million installations

Online lending volume surged

150x in a year, making the bank the country's leader in this segment.

User financial transactions increased eightfold in two years, driven by higher engagement.

# Optimizing Medical Sales Representatives' Routes with Al

#### Challenge

Sales representatives faced challenges such as:

- Manual visit logging
- Inefficient route planning
- Lack of real-time adaptability

#### Solution

- Trained models to analyze historical data and predict the most efficient routes.
- Geospatial clustering using the OPTICS algorithm to group medical institutions and reduce unnecessary long trips.
- Seamless integration with CRM and ERP systems to improve workflow and coordination.

#### Result

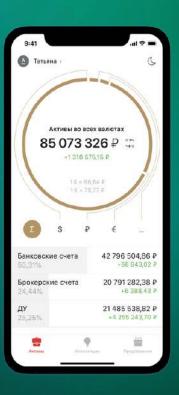

- Al-powered route optimization **reduced** travel time by 12-18 hours per month per sales representative.
- Operational costs reduced and sales reps' efficiency increased by over 20%.

**Our Approach** 

- √ Conducted an in-depth analysis of historical visit records.
- ✓ Applied machine learning models to identify inefficiencies in route planning.
- ✓ Developed a deep-learning-based predictive route optimization model.

# Application for the bank's VIP clients

Investment portfolio management is available online 24/7

# Progressive Web App for carsharing

MVP launch of a new product to the market in 4 months

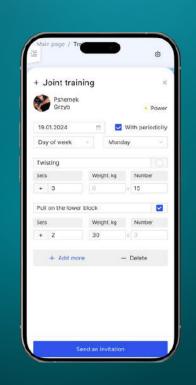

# Car leasing platform

The new system reduced the load on the call center and staff by 68%.

# Progressive Web App for planning workouts at the gym

The application is used by 81% of the fitness club chain's members

## Inhouse Competence Centers

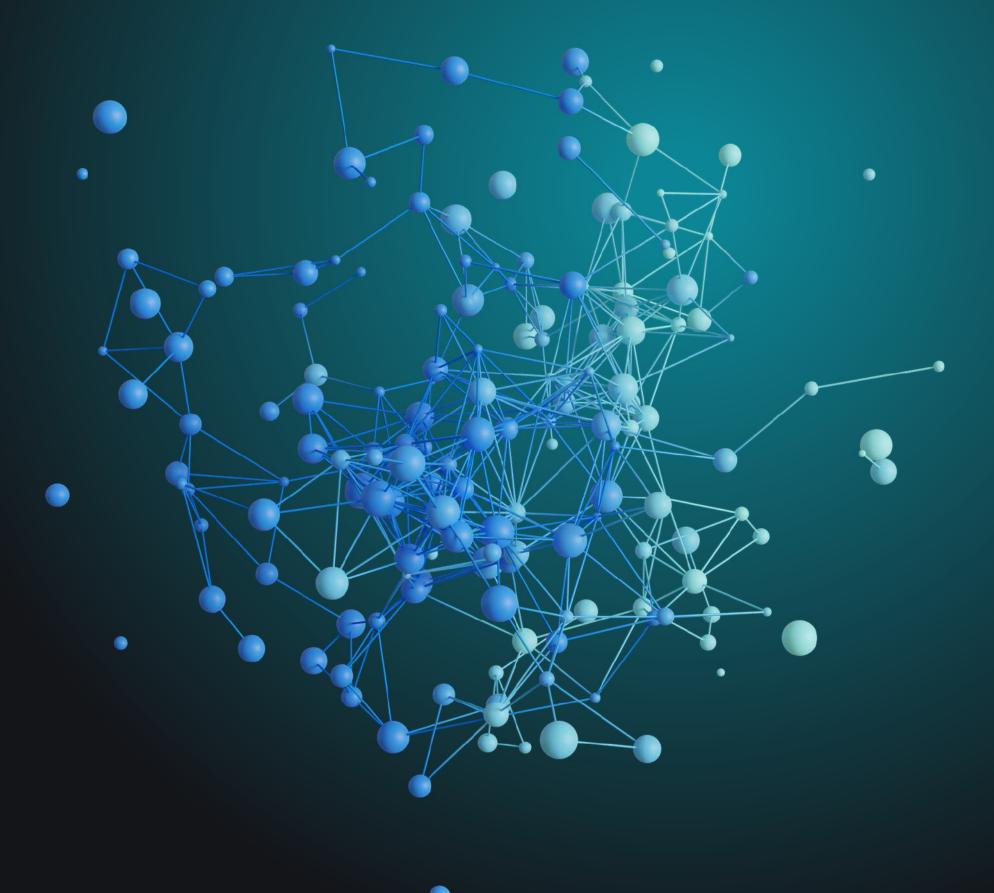

Top-skill experts in mobile development, cross-platform/PWA, frontend, backend, analytics, testing and design

# Flexibility in Everything

Need a quick launch or rapid team reassembly to meet new business demands? We're experts at it.

# Post-delivery Support

Ensure the team's participation in the finalization of the solution and elimination of critical bugs

# Development Resources

#### **CORPORATE DATA WAREHOUSES**

- Storage: Oracle, Hadoop
- ETL: Informatica
- BI: Cognos, Tableau
- CDC: Oracle GoldenGate

#### **MOBILE**

- Android: Java, Kotlin
- iOS: Swift

#### CROSSPLATFORM | PWA

- JavaScript, TypeScript
- React, Redux
- WebAPIs

#### **BACKEND**

- Development: Java, SpringBoot, SpringCloud, SpringData, Hibernate,
   .NET Framework, .NET Core, ASP.NET MVC
- SQL stores: PostgreSQL, MySQL,
- NoSQL stores: MongoDB, ElasticSearch, Cassandra
- ODS: Hazelcast, Redis
- Message Brokers: Kafka, RabbitMQ

#### **FRONTEND**

- Development: Typescript, ReactJS,
   Redux (toolkit, saga), NextJS
- Library: RTQ, axios, cypress, jest

#### INFRASTRUCTURE, CI/CD

- Docker
- Mesos/Marathon,
   Kubernetes
- Jenkins
- Ansible

#### **TESTING**

- Zephyr, TestLink, Allure, Quase
- JUnit, Kotest, Mohito
- XCTest, Sourcery
- Selenium (Selenoid, Grid),
   Cucumber

#### **ANALYTICS**

- UML, BPMN
- REST, SOAP
- Axure

# WislaCode customers confirm

# Loucas Charalambous payabl

We needed an Android SDK developed under a tight timeline, and their team delivered a flexible, user-friendly solution that integrated seamlessly into our ecosystem.

# Mikhail Krasnov **Executive Chairman at Verysell Group**

The WislaCode team delivered on time and with outstanding quality. I want to mention the team's transparency while running the project - everything was trackable, visible and manageable.

# Aleksei Malenkin

\$lana (Monetech)

WislaCode specialists quickly synchronised and worked with the second team involved in developing our solution. As a result, having started development from scratch, we came to the expected result quickly. The first users went to the application after 5 months.

# Yurii Lozinskyi **Head of Applied Al Lab**

This was a very task-heavy project. However, by the end of WislaCode, we were left with a detailed roadmap consisting of clear milestones — able to be converted into tangible KPIs. Integrating this structured result ensured that the more complex and uncertain goals were converted into 30% ROI.
