

by  WISLACODE SOLUTIONS

AI-powered search

Like ChatGPT, but never guesses
and never goes online

Unlocking Company's Knowledge

Documents, databases, APIs – information is scattered, and employees waste time searching.

WislaSearch is an AI-powered assistant that unifies fragmented data sources, indexes them, and instantly retrieves relevant information.

Finance & Leasing

Large Enterprises

Insurance

Legal& Compliance

Customer Support

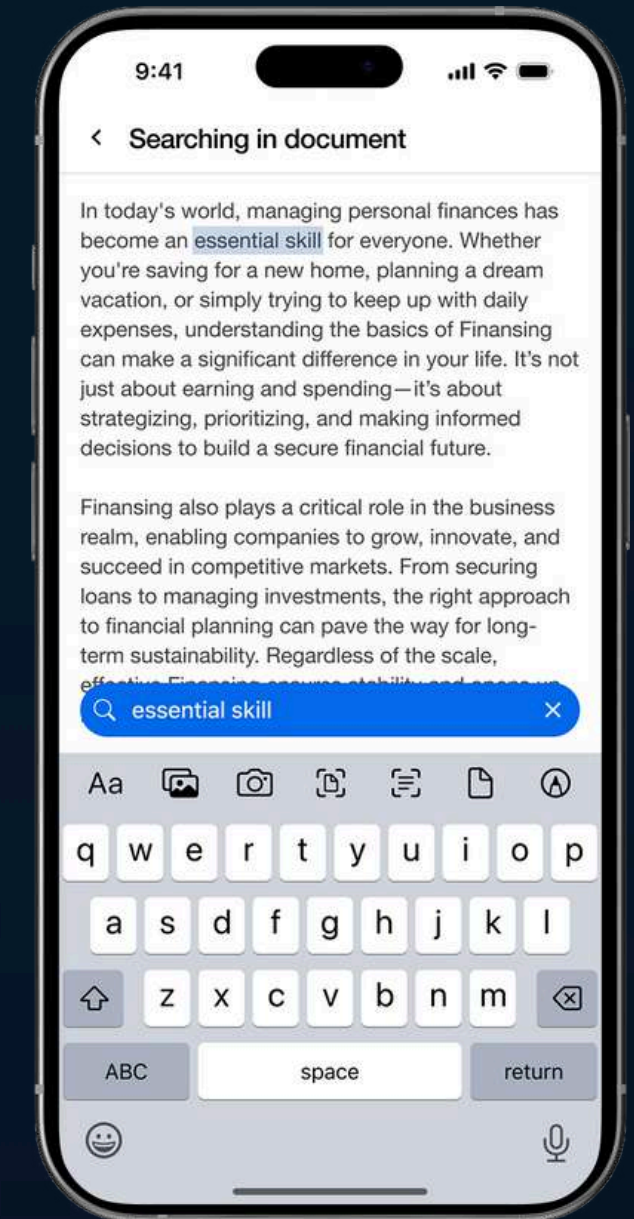

HR & Onboarding

Internal Training

Key Features of Our Solution

- ✓ All your knowledge in one place – seamless access across company data
- ✓ Local deployment – no external data transfers, ensuring security
- ✓ Instant, intelligent search – powered by AI, reducing search time
- ✓ Universal integration – connects to APIs, databases, and even external sources

A simple and user-friendly
chat interface

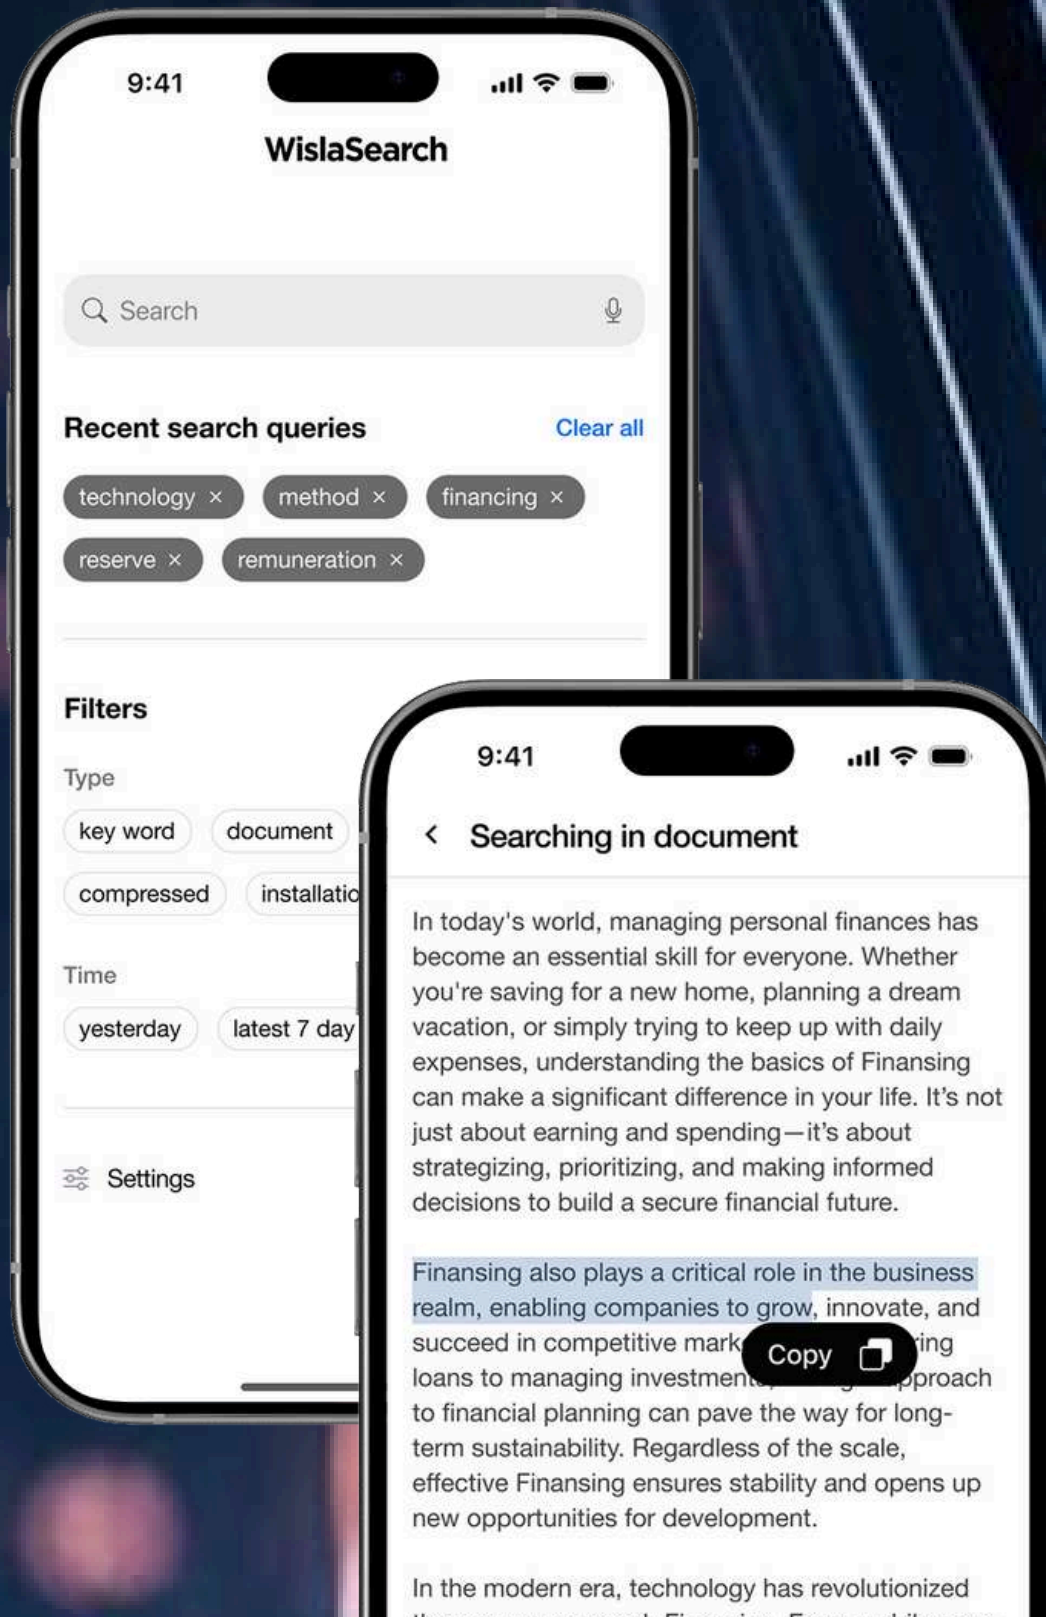

Compile a knowledge base from all sources

How it works for users

01 User asks a question via the chat interface

02 WislaSearch retrieves relevant internal documents

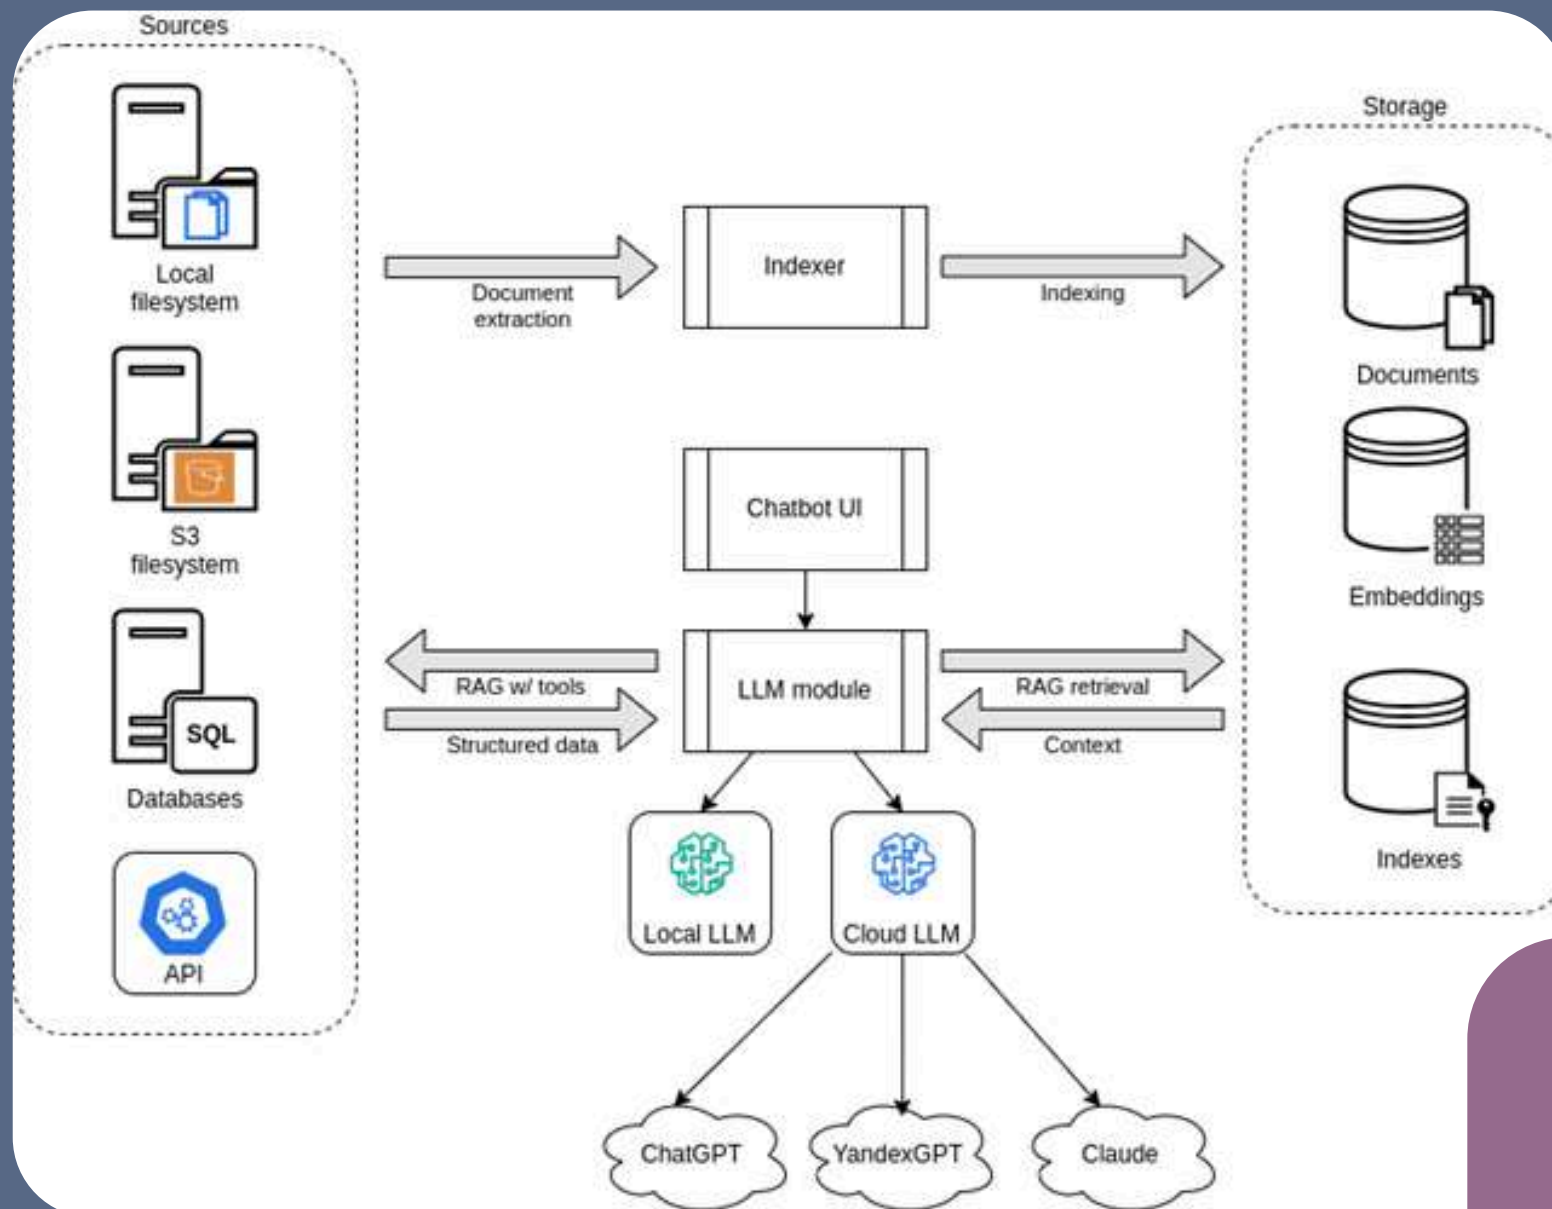

03 AI generates an accurate, context-aware answer

04 User receives the response and can leave feedback

Bonus features

- Keeps context from previous interactions
- Supports voice input and multilingual queries
- Personalised answers based on user role or department

Technical Architecture & Stack

An Efficient Microservices-Based Solution.
The core interaction pattern is Retrieval-Augmented Generation (RAG).

Key system components:

- **Information sources**
- **Indexer Component.** Handles document extraction from your sources and indexes them into an internal database.
- **Storage.** The internal database where documents, vector indexes, and other data are securely stored.
- **User Interface.** An interactive chatbot UI that makes it easy for users to engage with the system.
- **LLM Module.** Powers the logic behind generating accurate, context-aware responses to user queries.

Tech stack includes:

- LlamaIndex & HuggingFace for AI-driven search
- ElasticSearch & Qdrant for high-speed indexing
- Camunda & Kubernetes for enterprise-grade scalability

Join Our Pilot Program

Easy to Start

Launching WislaSearch is simpler than most IT solutions – no lengthy integrations or approvals needed.

Zero Risk

Everything runs locally. If it's not a fit, you can simply turn it off.

Pain-Free Digitalization

A smooth step toward transformation, without overhauling your entire infrastructure.

Quick Impact

Get valuable answers from the AI assistant within just one week of launch.

No Long-Term Commitment

The pilot is a short, low-pressure test – not a multi-year contract.

A Way to Test Ideas

The pilot helps quickly identify how AI can enhance your internal processes.
